## Experience

### 2020–DATE

System Management and Consultancy services • *Tutor and Consultant*

This is an information technology company where we offered a range of services to customers and the individuals visiting the stated organization for all of their communication problems. We also offered classes to students who were interested in learning computer packages I got actively involved as a volunteer tutor to the students.

---

## Education

GRETSA UNIVERSITY, THIKA

- I was enrolled in the stated university in the year 2021 for a course in Computer science at the moment I have an average GPA of 3.8 after a sum of scores during the three years of study.

---

## Communication

I have strong communication skills the ability to present to diverse audiences and explain technical concepts known to me effectively and with remote collaboration proficiencies.

## Skills

Being a computer science student I've been able to side-study and acquired intermediate skills in front-end development and in the verge to advance in them. I'm also into machine learning where after a reasonable amount of time. I'm planning to come up with a model that will enable the early detection of retina-based diseases in Kenya
